

Workshop on Data Analysis and Classification in honor of Edwin Diday

September 4th, 2007
Conservatoire National des Arts et Métiers, Paris

Program

Morning: 9:15 – 13:00
Afternoon: 14:30 – 18:30

Invited Conferences

Lynne Billard: *Dependencies and variation components of symbolic interval-valued data*

Hans Hermann Bock: *A history of the k-means algorithm*

David Hand: *Data analytic tools for mining personal banking data to detect fraud*

Melvin F. Janowitz: *Classify then summarize, or summarize then classify*

Carlo Lauro *Title TBA*

Ludovic Lebart: *Stability of principal axes*

Fred R. McMorris: *Consensus pyramids*

Jean-Paul Rasson: *Density-based distances: applications in clustering and discriminant analysis*

Organisation: P. Bertrand, H. H. Bock, P. Brito, G. Cucumel, F. de Carvalho,
Y. Lechevallier, B. Leclerc, G. Saporta.

Location: amphithéâtre Gaston Planté (also called amphithéâtre 1),
Conservatoire National des Arts et Métiers, 292 rue Saint-Martin, Paris.

Supported by CNAM - Paris and INRIA.

Registration: further information is available at <http://www.modulad.fr/dac>
